2. Summary speech of General Manager

At the beginning, the general manager actively interacted with us to mobilize the atmosphere of the scene. In the speech, taken the special problem of novel coronavirus as an example, the general manager shared the company's experience of adjusting strategy, changing the method, and overcoming the difficulties. In addition, the company still fulfilled its commitment on revenue to everyone and led everyone to achieve a breakthrough and historic impressive performance despite adjustment of the external environment, insufficient internal competitiveness and other difficulties.

To maintain the performance of 80 million yuan and continuous progress in 2023, the general manager put forward three requirements for us:

1. Change awareness, change the passive into the active.
2. Take action, be yourself, and take responsibility.
3. Improve our own ability, continuous learn and practice, responsible work should have results and be result-oriented.

Finally, the general manager required: all Jinda people should be responsible, united, enterprising and win-win in 2023.
